SITUATION SUMMARY

Water Main Break, Vallejo, Solano County (Initial/Final)

On 08/15/15 at 0857 hours the California State Warning Center (CSWC) received a report from Solano County OES advising a water main break in Vallejo caused a significant water outage in the city.

Cal OES Coastal Duty Officer (CDO) advised per Solano OES:

- The City of Vallejo was able to keep 20 PSI positive pressure in their water supply system except for a 4-6 block area. They expect to have the water main repaired by 0400 Sunday morning.
- The City of Vallejo has hoses to draw water from near Mare Island if needed for fire suppression.
- A strike team of five water tenders from Solano County assisted and were released by the Fire Chief at 1600 this afternoon.
- AT&T cooling towers were reported without water. Per CUEA, it has been confirmed that new AT&T equipment no longer have cooling towers so this incident will have no impact on communications.
- Vallejo City has activated their EOC located at 1220 Marin Street, Vallejo CA.
- Per the Cal OES Coastal Region Duty Officer (CDO) at 1820 hours, the City EOC and County EOC are now at monitoring status.
- City of Vallejo asked for bottled water for 30,000. OES delivered approximately 10,000 bottles of water to two distribution points for residents in the affected areas. Once the leak is repaired, the city will re-chlorinate the lines and test the water before declaring the emergency over.
- There were no requests for assistance or unmet needs.

SOC Activation for California Wildfires

- The State Operations Center (SOC) is activated at Level 2 from 0600-2000 hours due to the wildfires burning throughout California.
- The Coastal REOC is activated at Level 1.
- The Inland REOC is activated at Level 1.

Weather of Concern

- A combination of strong winds and low relative humidities will result in critical fire weather conditions from this evening until Sunday morning for portions of Del Norte, Humboldt, and Siskiyou Counties.
- A hot air mass will continue through this weekend as high pressure centered over the Four Corners Regions remains in place. Above-normal temperatures will occur with near-record heat expected in many locations and the hottest conditions will occur through Sunday for portions of southern California.
- High pressure over the desert southwest will lift north bringing a return of hot temperatures starting Sunday, lasting until Wednesday. Humidity values will be quite low through much of the coming week, even at night on the mid-slopes and ridges.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

The low pressure that had dominated northern California weather through yesterday has moved off to the northeast and high pressure over the desert southwest is beginning to push its way northward. A warming and drying trend will take place throughout the northern California region through Tuesday and possibly Wednesday. At the surface, a north-northeast/offshore downslope wind pattern will occur during nights and mornings and enhance the warm and dry conditions in the Sacramento Valley and surrounding foothills. These winds will reach speeds of 8-18 mph with gusts to around 25 mph in wind-prone areas but will diminish during afternoons. These winds will be a bit stronger on Sunday, and lighter north to east winds can be expected during nights and mornings Monday through Wednesday. Temperatures will climb to 5-10 degrees above mid-August normals today or Sunday with an increasing amount of single-digit minimum humidity readings to be found. Overnight relative humidity recovery will generally be lower especially for mid-slope and higher on the west-side timber fire areas. By late Wednesday or early Thursday, a dry low pressure trough will arrive with cooler temperatures and higher humidity through the end of the week.

SOUTHERN CALIFORNIA

Strong high pressure over the desert southwest will bring record heat to much of the region through Sunday with mid 80s to mid 90s in the mountains and upper 90s to 110 degrees in the valleys. The strong high pressure area will set up over California or just offshore Monday through Wednesday keeping temperatures above normal. However, onshore flow will increase bringing a slow cooling trend to the area. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the desert passes Monday afternoon through Wednesday. A trough dropping down from the Pacific Northwest will bring significant cooling late next week. Westerly winds across the desert passes will increase to 20 to 30 mph with gusts to 50 mph late next week. Minimum relative humidity will be mainly in the teens above and inland from the marine layer through the end of next week. The marine layer will slowly deepen each day next week and morning low clouds and fog will reach well into the coastal valleys by the end of the week.

Very Hot Weather through Sunday

High Temperatures through Sunday:

- 100-108° for the valleys & desert and 85-95° for inland coastal areas
- Excessive **HEAT** may persist through Monday

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.

CAL OES MISSIONS

Ongoing Cal OES Missions

- **2015-LAW-14579 08/01/15, 1220 hours:** Kern County Sheriff requested assistance in the search for a homicide suspect in the Kelso Creek area of Kern County. This has been a long, complex search involving several hundred personnel from Kern County. In addition, LA Sheriff has provided significant personnel and aircraft to the search. Additional personnel and/or equipment has been provided by Fresno County Sheriff, Tulare County Sheriff, San Bernardino County Sheriff, Orange County Sheriff, Stanislaus County Sheriff, Federal Bureau of Investigation, US Marshals Service, California National Guard, US Customs and Border Protection, Anaheim Police Department and the Governor's Office of Emergency Services. The search continues and additional resource requests are anticipated. See Cal OES's Web EOC entries for more details. **Update 08/12/15, 2146 hour.,** Suspect has been identified and name released to media. Searches continue with additional helicopter resources from CHP and Ventura County **Update 08/13/15, 0800:** Search continues with the addition of aviation assets from CHP and Ventura County. **Mission On-going**
- **2013-LAW-1563 07/23/15, 1225 hours:** Plumas County Sheriffs Office (PCSO) has requested Human Remains Detection K9 to search a specific site regarding a 30 year old cold case. LDO contacted K9 Coordinator who is currently securing K9 handlers from a team located out of Santa Clara County. PCSO has asked for two separate search dates to confirm any potential findings. Timeline for search efforts: August 1 - 6, 2015, Cal OES is currently working on securing these resources.
- **2015-LAW-14555 08/03/15, 0800 hours, Update 8/12/15:** Several of the fires within the complexes have been merged, with one fire, the Pelletreau (South Complex Fire), being moved into the Route Fire Complex and merged into the Johnson Fire. Windy conditions and overstretched fire resources has necessitated LE to assist with dynamic road closures lasting up to an hour or so. Trinity County Sheriffs Office is in the process of coordinating with the 5 Fire Complex Security Managers to capture thefts of fire equipment and fuel. Currently thefts of Diesel (approx. 200 gallons), New Batteries, New Fire Engine Tires (4) and a Water pump have been reported. The water pump was one of 42 that were ordered for the fire, Fire was only able to secure 17 of these pumps so the loss of this pump has exacerbated this situation. **Update 8/14/15:** Significant increase in fire activity, no new LE issues. **Update 8/15/15:** [No new significant information or changes in operational needs to report.](#) **Mission On-going**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
